Systems & Data: System Analysis & Design (SDLC), Database Design & Management (MySQL, ERD), ERP Systems, Dashboard Development & Reporting Systems, Microsoft Excel (Advanced), Google Workspace

Operations & Management: KPI Tracking & Performance Reporting, Process Optimization & Workflow Management, Project Coordination & PMO Support, HR Systems & Employee Tracking, Business Document Standardization

PROFESSIONAL EXPERIENCE

MIS Analyst & Financial Operations Specialist **10/2025 – Present**

Tasmeem Studio — Al-Khobar, Eastern Province, Saudi Arabia

- Increased projected profitability margins from 12% to 22.2% by re-engineering the studio's financial analysis, forecasting, and pricing across multiple business functions.
- Built scenario-based financial models and forecasts (base, conservative, and growth cases) that supported strategic planning for projects exceeding SAR 30M.
- Designed and deployed the studio's core operational systems from scratch — project tracking, a standardized pricing model (per-m² costing, instant-quote templates, and BOQs), contracts, and financial reporting — across 10+ client projects.
- Engineered a complete bilingual HR operations suite, including attendance, timesheet, and employee performance tracking systems.
- Standardized 80+ business, financial, and legal documents into a unified SOP manual, contract templates, and reporting frameworks.
- Produced feasibility studies, investor pitch decks, and cost-benefit analyses that formed the studio's investor-ready fundraising materials.
- Built financial monitoring and KPI reporting systems that informed executive budgeting, planning, and decision-making.

ACADEMIC PROJECTS

MIS Capstone Project — FlatMate Housing Platform **01/2025 – 05/2025**

Jubail Industrial College — Jubail, Saudi Arabia

- Developed a web-based shared-housing platform connecting roommates across Saudi Arabia to streamline housing matching and tenant coordination.
- Applied full SDLC practices, including business requirement gathering, system analysis, workflow design, and database design (ERD).
- Conducted market and user analysis to define business needs and improve user experience.
- Delivered complete project documentation, analytical reports, and system planning materials.
